

# THE dlb CHAIR

## COLOURFUL

The DLB chair is designed to help create a contemporary, lively and bright learning environment. With our stylish and innovative design it is possible to mix and match the seat shell and leg colours to either blend in or stand out in your inspiring spaces. This is a unique feature for any chair. The product is also available in bespoke colours (minimum quantity required). The DLB chair really does stand out and makes a significant impact in any space.

## PRACTICAL

The DLB chair is very safe and incredibly strong. The innovative and proven Don't Lean Back frame has been endorsed by a leading physiotherapist for providing exceptional lumbar support for young adults. Its stability stops students rocking on their chairs, avoiding injury and classroom disruption. The three-hole backrest ventilation helps maintain body temperature whilst learning, and the chair stacks and is environmentally friendly. The result of this superior design and ergonomic excellence is higher concentration, improved focus and greater learning.

## AFFORDABLE

The DLB chair is outstanding value and built to last. It is designed and manufactured in the UK with school, college, academy and university budgets in mind, without compromising on quality or durability. The strength of the MAX 2 comes from the integrity of the co-polymer materials and cutting-edge production methods we use. Testament to its toughness, every chair comes with a lifetime product warranty.
